Allowable Subject Matter

1. Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 10, the applicants have presented a persuasive argument, see page 6 of the response filed on 7/15/2005, that the cited prior art of Rudeck, taken alone or in combination, fails to disclose or render obvious a method of manufacturing a semiconductor device comprising the step of "depositing a second polysilicon film on the entire structure and then planarizing the second polysilicon film so that the oxide film protrusion is exposed, thereby forming a floating gate having the second polysilicon film formed on the first polysilicon film/ depositing a second polysilicon film on the entire structure and then removing the second polysilicon film on the oxide film protrusion by means of CMP process, thereby forming a floating gate having the second polysilicon film formed on the first polysilicon film since Rudeck does not suggest planarizing the polysilicon layer 590/ removing the second polysilicon film by means of CMP process because Rudeck method requires the roughness of polysilicon layer 590 for additional deposition step (fig. 5F)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
